

MY BONES MAY BREAK EASILY

**Please treat my bones
with special care and
do not exert force.**

My name is _____.

I have hypophosphatasia (HPP), a rare genetic disease that causes me to have soft bones.

Symptoms of fractures are not always obvious; x-rays may not always indicate a fracture. I am on a treatment that replaces alkaline phosphatase (ALP) that may cause false positives on ALP tests. (Read below for prescription details.)

STRENSIQ® (asfotase alfa) may affect other test results

It is important that you provide this card to any treating healthcare provider (HCP) as it contains information about lab test results.

STRENSIQ is a prescription medicine used to treat people with perinatal/infantile- and juvenile-onset hypophosphatasia (HPP). Low levels of ALP are a hallmark of HPP. STRENSIQ works by replacing ALP.¹

ALP is used as a detection reagent in many laboratory tests and the presence of STRENSIQ® in clinical laboratory samples could result in erroneous test results.¹

HCPs should inform laboratory personnel that the patient is being treated with STRENSIQ and discuss use of an alternative testing platform, which does not use an ALP-based reagent for patients receiving STRENSIQ treatment.¹

Serum ALP measurements are expected to be elevated during treatment with STRENSIQ and may be unreliable for clinical decision-making.¹

HCPs should review additional information on Drug Interference with Laboratory Tests in the accompanying full Prescribing Information for STRENSIQ®.

Emergency contact: _____

Emergency contact #: _____

For more information, healthcare providers should call (888) 765-4747 or email medinfo@alexion.com.

Remember to update your Medical ID within your mobile device's health app to include your HPP information.

INDICATION & IMPORTANT SAFETY INFORMATION for STRENSIQ® (asfotase alfa) 40mg/mL vial

INDICATION

What is STRENSIQ?

Strensiq is a prescription medicine used to treat people with perinatal/infantile- and juvenile-onset hypophosphatasia (HPP).

IMPORTANT SAFETY INFORMATION

What are the possible side effects of STRENSIQ?

STRENSIQ may cause serious side effects, including

- **Serious allergic (hypersensitivity) reactions** happened in some people who use STRENSIQ. Stop using STRENSIQ and go to the nearest hospital emergency room right away if you or your loved one have any of the signs and symptoms of a serious allergic reaction, including
 - Difficulty breathing
 - Swelling of your eyes, lips, or tongue
 - Hives
 - Feeling faint
 - Nausea or vomiting
 - Dizziness
 - Itching of your lips, tongue, or throat
 - Choking sensation
- **Skin thickening or pits at the injection site (lipodystrophy)** has happened several months after using STRENSIQ.
- **Calcium buildup in the eyes and kidneys** can occur if you or your loved one have HPP. Your healthcare provider should check the eyes and kidneys while you or your loved one use STRENSIQ.
- **Decreased efficacy.** Contact your healthcare provider if you or your loved one notice STRENSIQ is no longer working or experience worsening symptoms of HPP (e.g., increased respiratory support, increased difficulty walking, new fractures).

The most common side effects of STRENSIQ include local skin injection-site reactions (red skin patches, bruising, color change, pain, itching, thinning, swelling, pits, and bumps) and calcium buildup in your eyes and kidneys.

Strensiq may affect other lab test results, therefore it is important that you present your Medical Alert Card to your healthcare team so they are aware that you are being treated with an alkaline phosphatase (ALP) replacement therapy which may cause incorrect results on certain laboratory tests.

Tell your doctor if you are pregnant or plan to become pregnant or are breastfeeding or plan to breastfeed.

These are not all the possible side effects of STRENSIQ. For more information, ask your healthcare provider or pharmacist. Call your healthcare provider for medical advice about side effects. You may report side effects to the US Food and Drug Administration at 1-800-FDA-1088.

Please see STRENSIQ full Prescribing Information, including Patient Information and Instructions for Use.
