To Whom It May Concern:

This patient is currently being treated with STRENSIQ® (asfotase alfa), an enzyme replacement therapy manufactured by Alexion Pharmaceuticals and distributed by PANTHERx Rare™.

STRENSIQ is administered via subcutaneous injection, and is packaged in 2mL, single-use vials containing either 80 mg/0.8mL, 40 mg/mL, 28mg/0.7 mL, or 18mg/0.45 mL per vial. **STRENSIQ is neither a narcotic nor psychotropic medication. Needles and syringes are required for self-/caregiver-administration of STRENSIQ.** STRENSIQ is for individual use and not for resale.

STRENSIQ must be kept at a stable, cold temperature between 2-8 °C (36-46 °F) and protected from light to ensure medication stability. STRENSIQ is to be carried in a cooler specifically designed to maintain the appropriate temperature. Please note that due to the temperature sensitivity of STRENSIQ, **the cooler containing the medication must be stored in the cabin of the airplane** and not stored with checked luggage. Failure to maintain the proper temperature of STRENSIQ may cause it to lose stability, potentially rendering it ineffective.

For questions about this letter please call PANTHERx Rare Pharmacy at **1-844-787-6747**.

Respectfully,

Strensiq RxARECARE® Team
